Light Duty Models (2000 Lbs. Capacity)

All Light Duty models **Hippo Hoppers** are constructed from 12 Gauge Carbon Steel and are watertight boxes with 3/16" formed steel base with 1 1/2"x1 1/2" formed top rail support. The **Hippo Hoppers** has two piece structural rocker that is designed to allow the hopper to rock back into position after dumping (the fewer parts, the fewer problems). Each hopper is also equipped with a pull-down handle, making the hopper easier and safer to dump. Standard finish on all hoppers includes gray industrial paint (optional colors, powder coating, galvanizing steel and stainless steel also available).
