Super Duty Hopper (8000 Lbs. Capacity)

These hoppers are built for extra heavy jobs for extreme use and abuse. Applications include stone, packed glass, hot metal, concrete production etc. The larger Super Duty hoppers require a heavy duty forklift, normally 10,000 plus to handle the hopper weight and its load. All super duty models are constructed with thicker steel components and are beefed up with added support in key areas. The hopper boxes are constructed with 1/4" carbon steel and the corners, sides and back reinforced with additional angle steel supports. We have also added heavier base rails and more cross channel supports. The rocker assembly use 1/2" thick carbon steel and are supported with additional gussets.

MODEL
HH80SD

- Big and Easy pull-down handle release **Safe & Easy**
- Open sides allows the stacking of long material
- Laser cut "Rockin'Roller" design **Zero maintenance**
- 3/16" formed steel base
